### Professional Experience

**Front-End Developer, Skiivia Innovation | Current**

**From June 2023 to current**

- I have experience working on hybrid apps for Sai Groups. These apps feature notification functionality in all states of the mobile app, coupled with click-to-navigate capabilities.
- I utilized Firebase for backend support and implemented a Flexbox-based UI for enhanced layout flexibility. Implemented Firebase ,
- RestApis , AuthFlow , Navigations , websockets with the help of websockets we are handling the action on an app .
- Sai group all apps are in Android an IOS both with the same functionality. Also i use to create builds of the apps and update version according to latest changes.

**From Feb 2024 to current**

- Additionally, I contributed to the UI development of Jagcutz, a barber shop application.
- I also implemented authentication flows for users, staff, and managers within the app , RestApi Implementation , Implemented webServices like firebase with the help of firebase we gonna add notification functionality.

**From Dec 2023 to current**

- Moreover, I worked on EduCounselBuddy, an app focused on NEET counseling.
- In this project, I integrated Redux for state management, implemented authentication flows, and set up interceptors for managing HTTP requests.
- On the web platform, I designed the UI using Bootstrap and incorporated features such as modals, charts, and APIs utilizing HttpServlets for server-side interactions.

**Provision, Skiivia Innovation**

- Created a group chatting app with the help of firebase console.
- Learned responsive UI designing skills in native and IOS and notification implementation with firebase.
- Creating user authentication flow , navigations , generating apk , also enhanced my redux and restApi skills etc.
